

Chief Officer Decision Notice

For non-key decisions

Notice is hereby given that the following Chief Officer Decision has been made, as delegated by the Cabinet/Cabinet Member or under their delegated authority in the Council's Constitution.

1. NOTICE FOR PUBLICATION

Title of decision	Greener Homes Housing project 26/27–Phase 10 – various properties in Priory Avenue – Harefield (Lot 9 500k to 3m). (SCP ID 2902)
Name and Title of Chief Officer(s) making the decision	Dan Kennedy Corporate Director of Residents Services
Directorate	Resident services
Reference No.	2026 / 1766
Date of decision	28 July 2026
Relevant Ward	Harefield Village

Details of Decision Taken

Decision	The Chief Officer agrees to: Greener Homes Housing project - Phase 10 – various properties in Priory Avenue – Harefield. Direct award via the framework to Greyline Group Ltd. (Lot 9 500k to 3m).
Reason for decision	Description The proposed works to the property include the installation of wall insulation to improve thermal performance and energy efficiency. This will involve preparing the existing wall surfaces, fitting the appropriate insulation system, and making good all affected areas. Additional measures may include improving ventilation, as well as minor upgrades to enhance heating efficiency where required. The works are intended to reduce heat loss, improve indoor comfort, and help address issues such as damp and mould. Cost £ 509,852,19 The decision to approve the proposed Greener Homes Housing project – Phase 10 – various properties in Priory Avenue – Harefield. Direct award via the framework to Greyline Group Ltd. (Lot 9 500k to 3m). The works are being carried out to improve the overall energy efficiency of the property by reducing heat loss and lowering energy

	consumption. They will also enhance internal living conditions by improving comfort levels, while helping to address issues such as damp and mould through better insulation and ventilation. In addition, the works will help reduce future maintenance requirements by protecting the building fabric and preventing deterioration, while supporting wider objectives to reduce carbon emissions and deliver long-term cost savings for occupants.
Alternative options considered and rejected	No alternative options were considered, as the works are required to address the identified issues of poor thermal performance, heat loss, and associated damp and mould within the property, and to deliver the necessary improvements.
Factors considered	The Council has had due regard to its obligations under the Public Sector Equality Duty. No disproportionate adverse impacts on protected groups have been identified, and the delivery of the works alongside the ongoing External Wall Insulation (EWI) project will minimise disruption to residents. Appropriate arrangements will be made to support vulnerable residents where required. Residents are being engaged through the existing EWI communications, and relevant internal services, including Housing and Asset Management, have been consulted to ensure the works align with corporate and asset management objectives. There are no Human Resources implications arising from this decision, as the works will be delivered through the current contractor arrangements.
Report Author & Directorate	Merrik Knight Planned Works & Adaptations Manager Housing Residents Service

Legal and Finance Comments

Finance comments	The reports seeks Chief Officer approval to undertake the installation of wall insulation to HRA properties at a total cost of £510k, with the aim of improving thermal performance and energy efficiency across various properties on Priory Avenue, Harefield. The expenditure will be funded from the approved 2026/27 HRA Works to Stock Programme budget of £45,347k, which includes £10,250k allocated to the Green Homes Initiative Programme. The proposed investment forms part of the Council's Greener Homes Housing Project and will contribute to improved energy performance, reduced carbon emissions, enhanced resident comfort, and the long-term sustainability of the housing stock. The scheme supports the Council's wider housing and environmental objectives while maintaining and enhancing the condition and value of HRA assets.
-------------------------	---

Finance Officer name and Title	Noah Shoyoye Capital Finance Business Partner 16.07.2026
Legal Comments	The Council's Procurement and Contract Standing Orders ordinarily require competitive tenders to be sought before a contract is awarded. However, Standing Order 4.1(c) permits the use of established compliant frameworks and, where such a framework is used, the requirements to obtain further competitive tenders or quotations do not apply. The proposed award to Greyline Group Ltd is being made through the Council's Minor Works Framework Agreement (Lot 9 – Decarbonisation Works). Legal Services is satisfied that the proposed award complies with the Council's Constitution and procurement requirements. There are therefore no legal objections to the Council approving the recommendations set out in this report, including the award of the contract to Greyline Group Ltd. The proposed works will support the delivery of the Council's Greener Homes Housing Project and its wider objectives of improving energy efficiency, reducing carbon emissions and maintaining its housing stock.

SUPPORTING INFORMATION

Decarbonisation Programme Works

The works within this phase form part of the Council's wider decarbonisation programme and will include the erection and dismantling of scaffolding to facilitate a range of energy efficiency improvement measures. These works primarily consist of the installation of external wall insulation (EWI) and associated roofing alterations required to support and integrate the improvements.

To ensure the effective installation of the external wall insulation, alterations and extensions to sections of the existing roof are necessary. These works will provide the appropriate roof overhangs and weatherproof detailing required to maintain the integrity of the building envelope, prevent thermal bridging, and ensure compliance with current building regulations and energy performance standards.

Undertaking these roofing works alongside the decarbonisation measures represents best value for money, as it enables the works to be delivered as a single programme, minimising disruption to residents, reducing the need for repeat access and scaffolding, and supporting the long-term durability, safety, and energy efficiency of the properties.

The proposed contract award is to Greyline Group Ltd with an estimated value of £510k.

These works are proposed as a variation to the existing contract in accordance with the National Schedule of Rates under the LBH Minor Works Framework Agreement – Lot 9 Decarbonisation Works.

RESIDENT BENEFIT & CONSULTATION

The benefit or impact upon Hillingdon residents, service users and communities?

This recommendation will ensure that the tenants and residents of these properties have a safe and weather-proof home. This will also reduce the number of emergency repair requests and meet the Council's vision of "putting residents first".

Consultation & Engagement carried out (or required)

A 'Meet the Contractor and Project Team' event will be arranged prior to works commencing to fully explain the works to all residents.

The contractor will provide a dedicated RLO to field any issues.

CONSULTEE COMMENTS

Finance comments

Finance has reviewed the Phase 6 Greener Homes project proposal for the Council-owned properties at various properties in various properties in Priory Avenue Harefield. The scheme requires capital investment of £510k, to be funded from the 2026/27 approved HRA Works to Stock (WTS) budget and is therefore contained within existing approved resources.

The works will install external wall insulation and enhanced ventilation measures, improving the property's energy performance to EPC C standard. This will reduce heat loss, improve resident comfort, lower energy consumption and support the Council's carbon reduction objectives.

The investment will also help reduce the risk of damp, condensation and mould, supporting resident wellbeing and helping the Council meet its obligations under evolving housing regulations, including Awaab's Law, while reducing the potential for future disrepair claims and associated legal costs.

The project is expected to deliver longer-term value through reduced reactive maintenance requirements, lower lifecycle costs and improved asset sustainability. Works will be delivered through the Council's appointed framework contractors using the National Schedule of Rates (NSR), providing assurance that costs are competitive and represent value for money. Overall, the proposal remains affordable within approved HRA resources and supports the Council's strategic objectives for housing quality, compliance and decarbonisation.

The scheme is expected to generate longer-term revenue benefits through reduced energy consumption, although savings will depend on asset performance and energy prices, alongside potential ongoing maintenance costs. While financial returns are likely to be longer-term, the proposal aligns with the Council's strategic objectives on carbon reduction and asset sustainability, with key risks relating to cost variation and delivery mitigated through appropriate project governance and monitoring.

Legal comments

The Council's Procurement and Contract Standing Orders ordinarily require competitive tenders to be sought before a contract is awarded. However, Standing Order 4.1(c) permits the use of established compliant frameworks and, where such a framework is used, the requirements to obtain further competitive tenders or quotations do not apply.

The proposed award to Greyline Group Ltd is being made through the Council's Minor Works Framework Agreement (Lot 9 – Decarbonisation Works). Legal Services is satisfied that the proposed award complies with the Council's Constitution and procurement requirements. There are therefore no legal objections to the Council approving the recommendations set out in this report, including the award of the contract to Greyline Group Ltd. The proposed works will support the delivery of the Council's Greener Homes Housing Project and its wider objectives of improving energy efficiency, reducing carbon emissions and maintaining its housing stock.
